Designed for living. Built for caring.

We specialise in designing and furnishing spaces fit for the demands of the Care Industry. Not only are the products we offer, practical and durable, but we believe design goes far beyond selecting a colour palette – it's about creating an environment that enhances comfort, care, and dignity.

That's why we offer a complete service; from initial consultation, to the drawing board, to sourcing just the right pieces of furniture and furnishings, right down to the fit-out itself. We'll even go as far as removing old furniture and disposing of it for you.

With James Clement, you get:

- **A Dedicated Interior Designer**
- **Procurement of Nursing Home-Friendly Furniture & Accessories**
- **Project Management**
- **Delivery & Installation**

Whether you are fitting out a Nursing Home for the first time or it's time for a refurbishment, contact us to set up a meeting to discuss the requirements for your project.

Our team is ready to help make your vision a reality.

Good interior design is essential to the happiness and well-being of every resident in every Care Home. Experienced staff and quality clinical care is still essential, but alone, it is no longer enough to impress prospective residents and their families.

Interior Design

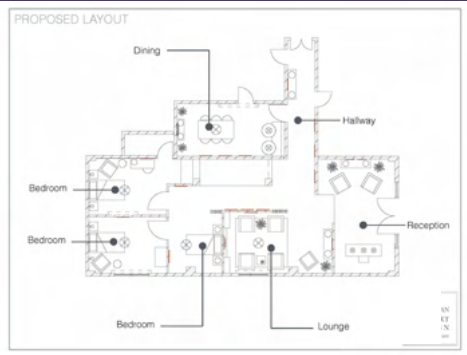

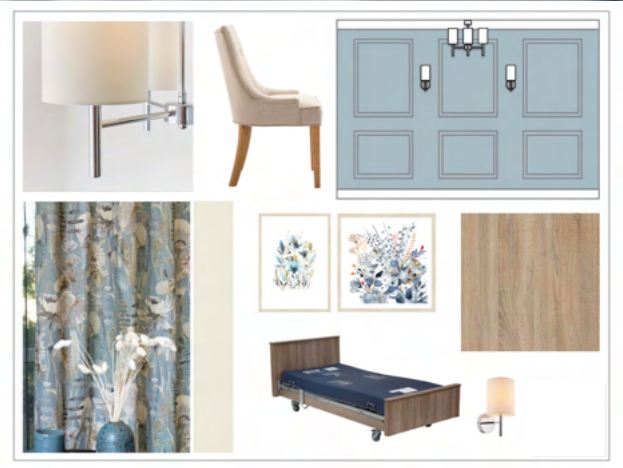

We work with a number of interior designers who create functional, safe, and aesthetically pleasing spaces by assessing space requirements, determining optimal furniture placement, and curating a considered selection of furniture, fixtures, fittings and decorative items, all while adhering to the relevant parameters set by governing healthcare bodies.

We understand that there are so many elements involved in caring for older people; dementia, visual impairments, mobility and hygiene, are just a few considerations.

For residents, many of whom will live out their days at your facility, it's about the experience, while making their environment comfortable and engaging. For staff, it's about providing an environment where outstanding care can be provided safely, and one which is designed to simplify routine challenges and tasks.

Often, it's the smallest changes that make the biggest difference, but by seeking professional guidance, you can make sure all design changes improve the resident's overall experience. Not only will your Interior Designer provide professional advice, they will also provide initial design concepts and advise on use of space, colour schemes, fabrics, fittings and furniture style.

The James Clement team will then provide product and material specifications, as well as coordinate with intersecting trades to manage the project from concept to completion; supplying projected timelines and product schedules to coordinate trades, purchase orders and deliveries.

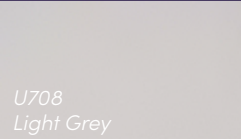

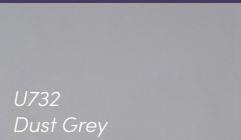

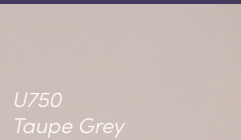

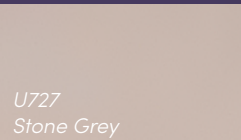

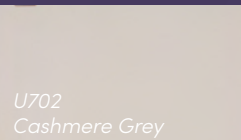

The main goal is to improve the effectiveness, accessibility, functionality and aesthetic appeal of an environment in a way that ensures the safe and optimal occupation and use of the interior space, to curate a purpose-built environment, while understanding how an interior design scheme can positively impact the end-user.

Bedrooms

Matching bedroom sets including bed, overbed table, bedside locker, chest of drawers and wardrobes are available in all of these colours.*

Pick a colour...

 <p>H3368 Lancaster Oak</p>	 <p>U708 Light Grey</p>

 <p>H3331 Natural Nebraska Oak</p>	 <p>U750 Taupe Grey</p>
 <p>H3332 Grey Nebraska Oak</p>	 <p>U727 Stone Grey</p>
 <p>H3710 Natural Carini Walnut</p>	 <p>U702 Cashmere Grey</p>

We have a wide selection of furniture hardware styles and finishes to choose from.

Ask us about the current bedroom packages on offer.

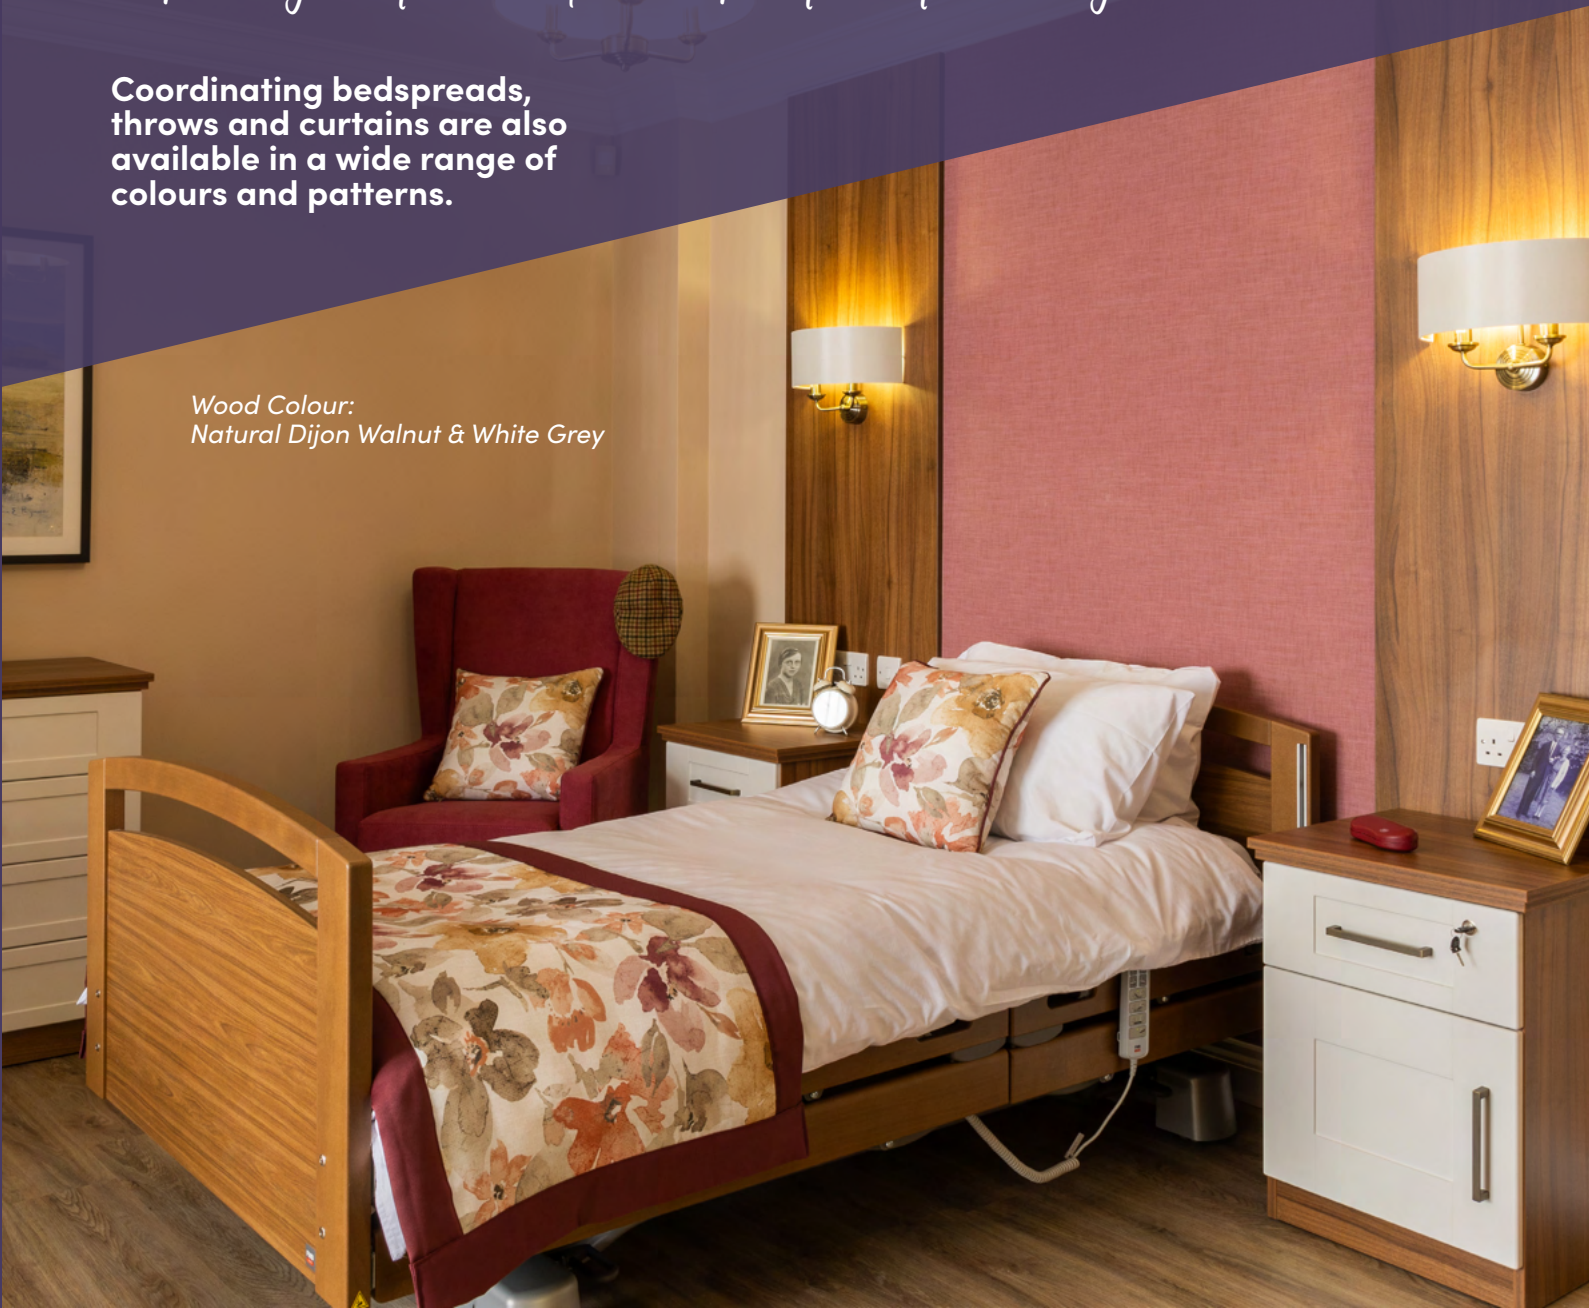

**Subject to minimum order quantity.*

Thoughtfully designed for modern living, each piece reflects a commitment to quality, well-being, and timeless elegance. With smooth functionality and refined aesthetics, the James Clement portfolio offers practical support without compromising on style – ideal for contemporary elderly care settings.

Coordinating bedspreads, throws and curtains are also available in a wide range of colours and patterns.

Wood Colour:
Natural Dijon Walnut & White Grey

Burren Low Bed

Burren Low Profiling Casa Elite Bed with Bedrails in Oak

The Burren Low Profiling Bed has been designed to give all the same flexibility and comfort associated with the Burren brand, whilst ensuring the bed is compliant with the guidance on safe working heights. The Burren Low raises to a maximum height of 63cm (for the safe, comfortable working of the carer), and lowers to just 23cm (ensuring safe, comfortable transfers to and from the bed for users).

- The adjustable four-section metal mesh mattress platform offers a luxurious range of positioning options.
- The bed has two motors enabling three of the four sections to be independently positioned.
- Dual action headrest and knee-break adjustment plus ratchet telescopic fittings for additional foot positioning ensure totally bespoke comfort.
- Fitted with a reliable Dewert actuator control system, the bed features simple, intuitive handset controls for independent use, and can also be manually positioned, if required.
- Double rim lock castors make the bed very easy to manoeuvre.
- Easy to install, clean and dismantle.
- SWL 165kg / 26st

FMB Ultra Low

FMB Formidabel E50

Fresh.
Modern.
Stylish.

FMB Formidabel E50 Bed

FMB Formidabel E50 Profiling Bed with dual braking system, metal mesh base with solid or split side rails.

- The scenario handset with easy-to-understand symbols helps the resident to find a comfortable position with the press of one button.
- Full-length rails on both sides
- Solid head/footboards
- 12 colour options
- Safe working load 175kg (27 St)
- Height adjustment 26-80cm
- 4x 50mm castors (enclosed in silver/grey casing)
- Multi-position handset
- 2-year guarantee

Solid Side Rails

Split Side Rails

Mattresses

Conforma 3000 Static Foam Replacement Mattress

- Risk Category: High Risk
- Fatigue Class: Very Severe
- High density, castellated, combustion ether foam (CME) ensures total comfort is achieved whilst delivering excellent pressure redistribution.
- Multi-stretch, vapour permeable, sewn cover for infection control.
- Dimensions: 198x88x15cm
- Max Loading Weight: 30st/190kgs
- 3-year warranty

Herida Moray Combo Hybrid Mattress c/w pump

- Risk Category: Very High Risk (up to and inc. Grade IV pressure ulcer)
- Designed with specific consideration towards heel damage and patient comfort.
- High quality foam filled cell technology.
- CME foam surround and base maintains pelvic stability for transfer.
- A digital pump can be fitted to the mattress to provide dynamic or alternating pressure therapy.
- Dimensions: 198x88x16cm (sloping to 9cm at heel end)
- Max Loading Weight: 39st/248kgs
- 5-year warranty

Mattresses

Herida Moray Combo Deluxe Hybrid Mattress c/w pump

- Risk Category: Very High Risk (up to and inc. Grade IV pressure ulcer)
- 1-inch foam comfort cartridge.
- Designed with specific consideration towards heel damage and patient comfort.
- High quality foam filled cell technology.
- CME foam surround and base maintains pelvic stability for transfer.
- A digital pump can be fitted to the mattress to provide dynamic or alternating pressure therapy.
- Dimensions: 198x88x16cm (sloping to 9cm at heel end)
- Max Loading Weight: 39st/248kgs
- 5-year warranty

Herida Argyll Full Replacement Air Flow Mattress c/w pump

- Risk Category: Very High Risk
- Fatigue Class: Very Severe
- High-end, specialised dynamic mattress replacement system with a digital pump, targeted towards the assistive treatment for patients who have existing and potentially severe pressure damage.
- Static mode
- CPR function
- Easy to transport
- Alarm function
- Digital pump with tamper-proof lock
- Dimensions: 200x88x20cm
- Max Loading Weight: 28st/180kgs
- 5-year warranty

Overbed Tables

Coast Overbed Table

Natural Nebraska Oak

Lancaster Oak

Natural Carini Walnut

Additional Table Top Colour Options:

						
Light Grey U708	Dust Grey U732	Taupe Grey U750	Stone Grey U727	Cashmere Grey U702	Natural Halifax Oak H1180	Grey Nebraska Oak H3332

Overbed Tables

Custom-Made Overbed Tables

We can also supply tables with a table top to match the rest of the bedroom furniture you've chosen.

For a cohesive finish, consider matching your overbed table to the rest of your bedroom furniture – a small detail that makes a big impact.

Key Features

- Height adjustment from 74cm – 109cm
- Anti-trapping safety feature allows automatic rising after contact with user.
- Fire retardant, light oak laminate top.
- Four swivel castors allow manoeuvrability for easy positioning.
- Magnolia epoxy coating with BioCote®, an antibacterial coating which reduces cross infection.
- Supplied fully assembled
- Product weight of 22 kgs
- Maximum table load: 30kg

Bespoke colour-matched options are available on enquiry (subject to order quantity), alongside unique customised bedroom furniture packages to complement.

Custom-Made Overbed Tables

Bedroom Furniture

Coast-Line Range

The Coast-Line range is our most popular style.

This range features:

- Cottage Pleat
- Roman Blinds
- Pinch Pleat
- Eyelet
- Poles & Tracks
- Tab Top
- Pelmet
- Matching Tiebacks

Reception Desks

Writing Desks

Bookcases

Dining/Cafe Areas

Bespoke Joinery

Furniture that fits!

Every piece of furniture is made to healthcare specification, and with so many different options to choose from, all our furniture is made to order, so it fits the exact space you have for it.

Wayfinding

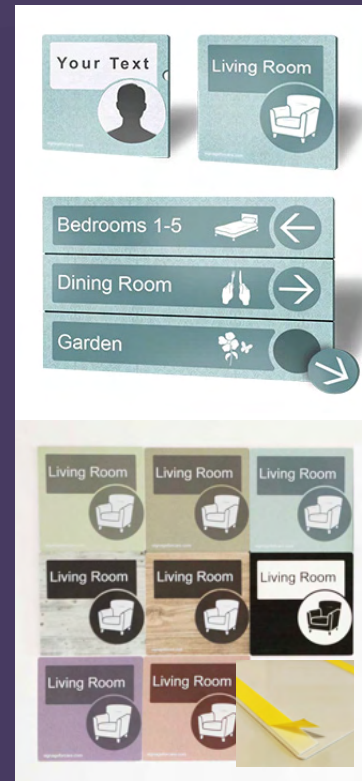

Wayfinding is about helping residents navigate through their environment using orientation cues. The use of signage and wayfinding aids with the correct LRV's (light reflecting values) helps reduce stress and confusion while giving residents a clear understanding of what the purpose is.

The use of environmental prompts around the Care Home can aid spatial problem-solving. These can include the use of specific colours, furnishings, lighting, and signs.

Nursing Home signage and wayfinding for elderly homes are amongst the most challenging to get right. It requires an understanding of the needs of residents, staff, and visitors, with an emphasis on those who do not interpret signs and recall wayfinding in a typical way.

To compound this challenge, it is important to remember that the Care Home is just that; a home. The design must complement the aesthetic of the Home and give a sense of homeliness. Further, the construction must meet the requirements of a healthcare provider for hygiene and accessibility.

This artisan inspired range features both soft hue'd colours and textured, lifelike, wood finishes. Not only will they be functional but they will help to transform an environment into a colourful, pleasing place to be.

Wayfinding is a vital component of any Care Home design. When used effectively, it can dampen the stresses of dementia and boost the well-being of residents.

We can help design a perfect wayfinding scheme for your home.

Visual prompts and aids help residents feel at ease when navigating the Care Home. These prompts could range from distinctive art to obvious objects and wayfinding signs.

Other factors that should be considered are colours used, lighting and sign placement.

Designed for dignity

Ceiling Hoists

Ceiling lift system designed for routine transfers of patients.

- Quick release track attachment
- Quick change battery design
- Quick magnetic hand control connection

GoLift boasts state-of-the-art battery technology coupled with all-metal gears that allow the caregiver to safely, and effortlessly, transfer a patient.

The modular track system gives you flexibility to suit the needs of any working environment.

Depending on how the hoist is to be used, we are able to design and fit straight, curved and XY track configurations (allowing full room coverage) together with transition gates and turntables.

Visit our showroom to see the ceiling lift system in action.

Sluice Rooms

Planning or redesigning a sluice room for a new or refurbished Care Home involves carefully considering all factors relating to infection control, access, workflow and layout.

Not only will an optimised layout make life much easier for your staff, but it will also greatly reduce the risk of spreading infections resulting from cross-contamination of bodily fluids and human waste.

We can support you in the planning, design and specification of new or existing facilities, enabling you to meet the highest infection control standards.

- Free no-obligation quote.
- Discounted utensil packages when purchased with a bedpan washer.
- Commissioning of products as standard.

Our team of certified engineers can install and commission your sluice room equipment.

To achieve optimum infection control in your sluice room, there are a number of essential fixtures and fittings you should include:

DISPOSAL/SLOP HOPPER

A temporary collection point for soiled/hazardous items, a back-up disposal method in the event of power or mechanical failure, and a facility for filling and emptying cleaners’ buckets.

WASHER DISINFECTOR

To thoroughly disinfect reusable utensils e.g. bedpans, commode pots, urine bottles, etc.

PULP MACERATOR

To macerate and dispose of medical pulp containers and their contents.

DEEP STAINLESS STEEL SINK

For general washing and rinsing purposes.

STORAGE CUPBOARDS

For items such as single use disposable bedpans and replacement chemical bottles.

WALL-MOUNTED RACK

For temporary storage and drying of reusable utensils before returning them to rooms.

STAINLESS STEEL HANDWASH BASIN

Located near the door to ensure hands are readily washed before disinfected items are touched and before exiting the room, with lever or sensor operated taps to prevent the spread of infection.

OTHER CONSIDERATIONS:

- FOOT-OPERATED CLINICAL WASTE BIN
- WORK SURFACE
- SHELVING
- LIQUID SOAP DISPENSER
- PAPER TOWEL DISPENSER
- PEDAL BIN
- FIRE DOOR (depending on local regulations)
- SEALED FLOOR COVERING (vinyl or similar)
- TILED OR ASEPTIC LAMINATE WALLS
- EXTRACTOR FAN
- LIGHTING

Sluice Rooms

DDC Panamatic Midi Bedpan Washer Disinfector

The **Panamatic Midi** is set to enhance your facility's infection control processes while upholding your dedication to exceptional levels of care.

- Mid to high-range capacity to suit average and high usage environments
Cleans up to 2 pots and 2 urine bottle per cycle.
- Rapid 7-minute washing disinfection cycle – eco-friendly and cost effective.
- Hands-free open & close technology using a foot cup or infrared sensor to minimise cross infection and make it easy-to-use so clinicians can quickly return to caring for patients.
- Top-loading – for a simple loading and emptying process.
- High-grade stainless steel casing, which is robust and long-lasting. It is not easily corroded, but easy-to-clean and maintain.
- Antimicrobial surfaces to minimise cross infection and reduce the possibility of microbial growth.
- Automatic scale management system – suitable for soft and hard water areas, to prevent blockages.
- Optional programmable audio in your own language to ensure correct and proper use by staff.
- Rotating wash nozzles and strategically sited spray jets ensure a superior wash performance.

Panamatic Midi

- Unique multi-utensil racking design – extremely convenient with one rack to fit all standard bedpan sizes.
- Compact – to save space, making it suitable for all room types and sizes.
- Standard electrical supply – so you can connect and go!

Other Bedpan Washer Disinfectors that we offer, include:

Panamatic Mini

Smaller capacity to suit low usage environments – can clean 1 bedpan and 1 urine bottle per cycle. Rapid 6-minute washing disinfection cycle.

Panamatic Maxi

Extra-large capacity wash chamber to suit high usage environments – can clean 3 pots and 2 urine bottles per cycle. The Maxi has the largest capacity in the industry. Rapid 7-minute washing disinfection cycle.

Panamatic Optima 2

Large capacity to suit high usage environments – can clean up to 2 bedpans and 2 urinals per cycle. Rapid 8-minute washing disinfection cycle.

Panamatic Optima 3

Our largest capacity machine to suit very high usage environments – can clean up to 3 bedpans and 3 urine bottles per cycle. Rapid 10-minute washing disinfection cycle.

Baths

Support complex bather needs with Gainsborough specialised baths.

S&E CareTrade is the sole distributor for the Irish market. Our team of engineers can install and commission your bath. If you are replacing a bath, they will also take the old bath away and dispose of it on your behalf.

All Gainsborough baths contain BioCote® technology that provides long-lasting, continuous product protection against microbes.

Uniquely built into every Gainsborough bath, this silver-ion technology delivers unparalleled hygiene and 99.9% 24/7 protection against microbes, bacteria, and some viruses.

Invisible BioCote® cannot be wiped or worn away, and is effective for the lifetime of every bath, supporting your latest infection control procedures and boosting CQC ratings.

- BioCote® is proven effective against influenza A H1N1, E. coli, Salmonella and CRO, CRE, VRE, and MRSA.
- Reduces the risk of cross-contamination.
- 24/7 protection for the lifetime of the bath (not a coating, integrated during manufacture).
- Zero maintenance and no specialist fluids are required.
- Advanced hygiene to ensure infection control.

James Clement Hughes

1887–1953

Extraordinary Vision. Lasting Legacy.

An ordinary man with extraordinary vision that helped change the course of history.

James Clement Hughes was born in 1887 in Hackney, East London, and following in his father, Walter's footsteps, became a structural engineer.

In 1911, at 24 years of age, he married Hephzibah Ada Pritchard and lived in the industrial heartland of Manchester for a number of years, before returning to London.

On the 24th September 1917, James and Ada had a second son, John Ernest, who also followed in his father's footsteps.

James Clement had become the Chief Engineer for Industrial Constructions Ltd, but in August 1931 he started his own practice, J.C. Hughes M.I.Struct.E. Consulting Structural Engineer,

at 44 Grosvenor Place London SW1. About that time, it appears that they lived in Burgess Hill, according to entries in the original cash book.

His first two contracts were the Abergavenny Corporation Reservoir Cover (1931) and the City of Norwich Water Tower (1932), which can still be seen today.

Following John's studies in Structural Engineering at night school, he joined his father in J.C. Hughes & Partners.

During World War II, John's renowned skill was called upon by the Allied forces in their quest to liberate occupied France. He became part of a top-secret operation to achieve the impossible – to breach the German-held and seemingly impenetrable Normandy coast. The whole project was finally known as Mulberry Harbour.

Visionary in its design, Mulberry Harbour was made of steel and concrete – but it could float.

This proved critical in the success of the largest seaborne invasion in history, the D-Day landings.

Towed across the English Channel by boat, the harbour provided Allied vessels with safe moorings while floating ramps meant troops, tanks and artillery were able to make land.

Two weeks later, all German efforts to secure their defences at Normandy were laid waste by what their own great defence architect Albert Speers described as "an idea of simple genius".

Today, the name James Clement is still synonymous with quality, innovative design, and a desire to make the world a better place.
